Contents

Volume 47 (1988)

No. 1

J.S. Brabson and G.J. Schroepfer, Jr. (Houston, TX), *Inhibitors of sterol synthesis. The effects of dietary 5α-cholest-8(14)-en-3β-ol-15-one on the fate of [4-^{14}C]cholesterol and [2,4-^{3}H]5α-cholest-8(14)-en-3β-ol-15-one after intragastric administration to rats* 1

D.J. Monger and G.J. Schroepfer, Jr. (Houston, TX), *Inhibitors of cholesterol biosynthesis. Further studies of the metabolism of 5α-cholest-8(14)-en-3β-ol-15-one in rat liver preparations* 21

H. Eibl and P. Woolley (Göttingen, F.R.G. and Århus, Denmark), *Synthesis of enantiomerically pure glyceryl esters and ethers. II. Methods employing the precursor 3,4-isopropylidene-D-mannitol* 47

P. Woolley and H. Eibl (Århus, Denmark and Göttingen, F.R.G.), *Synthesis of enantiomerically pure phospholipids including phosphatidylserine and phosphatidylglycerol* 55

H. Eibl and P. Woolley (Göttingen, F.R.G. and Århus, Denmark), *A general synthetic method for enantiomerically pure ester and ether lysophospholipids* 63

D. Uhríková and P. Balgavý (Bratislava, Czechoslovakia), *Location of terminal methyl groups of acyl chains, in the bilayer of unilamellar phosphatidylcholine liposomes: a ^{13}C-NMR study* 69

W. Th.M. De Groot, C.M. Lok and J.P. Ward (Vlaardingen, The Netherlands), *Synthesis of some oxo- and hydroxyacylglycerols* 75

Announcement 81

No. 2

D.A. Pink, A.L. MacDonald and B. Quinn (Antigonish, Canada), *Anisotropic interactions in hydrated cerebrosides. A theoretical model of stable and metastable states and hydrogen-bond formation* 83

M.B. Bally, L.D. Mayer, H. Loughrey, T. Redelmeier, T.D. Madden, K. Wong, P.R. Harrigan, M.J. Hope and P.R. Cullis (Vancouver, Canada), *Dopamine accumulation in large unilamellar vesicle systems induced by transmembrane ion gradients* 97

A. Sen, P.W. Yang, H.H. Mantsch and S.-W. Hui (Buffalo, NY and Ottawa, Canada), *Extended hydrogen-bonded structures of phosphatidylethanolamine* 109

J. Kötting, H. Eibl and F.-J. Fehrenbach (Berlin and Göttingen, F.R.G.), *Substrate specificity of Staphylococcus aureus (TEN5) lipases with isomeric oleoyl-sn-glycerol ethers as substrates* 117

A.A.M. Van der Kleij, F. Oltmans, W.S.M. Geurts van Kessel and B. De Kruijff (Utrecht, The Netherlands), *Interbilayer swelling and the L_{α}-H_{II} phase transition in phosphatidylethanolamine-phosphatidic acid mixtures* 123

F. Severcan and S. Cannistraro (Perugia, Italy), *Direct electron spin resonance evidence for α-tocopherol-induced phase separation in model membranes* 129

A. Singh, T.G. Burke, J.M. Calvert, J.H. Georger, B. Herendeen, R.R. Price, P.E. Schoen and P. Yager (Washington, DC), *Lateral phase separation based on chirality in a polymerizable lipid and its influence on formation of tubular microstructures* 135

M.V. Piretti, G. Pagliuca and M. Vasina (Bologna, Italy), *Transmethylation of neutral and polar lipids wuth $NaBH_4$ in the presence of NaOH* 149

G. Beurer, F. Warncke and H.-J. Galla (Darmstadt, F.R.G), *Interaction of polymyxin B_1 nonapeptide with phosphatidic acid monolayer and bilayer membranes* 155

No. 3

E. Ayanoglu, H. Li, C. Djerassi and N. Düzgünes (Stanford and San Francisco, CA), *Unusual sponge phospholipids and their analogs. Synthesis and interactions with conventional phospholipids and cholesterol in model membranes* 165
L.R. Miller, D.L. Raulston and G.J. Schroepfer, Jr. (Houston, TX), *Inhibitors of sterol synthesis. Effects of dietary 5α-cholest-8(14)-en-3β-ol-15-one on early enzymes in hepatic cholesterol biosynthesis* 177
G.J. Schroepfer, Jr., E.J. Parish, M. Tsuda and A.A. Kandutsch (Houston, TX and Bar Harbor, ME), *Inhibitors of sterol synthesis. Chemical syntheses, properties and effects of 4,4-dimethyl-15-oxygenated sterols on sterol synthesis and on 3-hydroxy-3-methylglutaryl coenzyme A reductase activity in cultured mammalian cells* 187
M.S.F. Lie Ken Jie and W.L.K. Lam (Hong Kong), *The synthesis and study of some of the physical properties of diphenylated fatty derivatives and their chromium tricarbonyl complexes* 209
J.P. Ward (Vlaardingen, The Netherlands), *Synthesis of hydroxyl thiol esters from glycidol esters* 217
G. Klose, B. König, H.W. Meyer, G. Schulze and G. Degovics (Leipzig, Jena and Merseburg, G.D.R and Graz, Austria), *Small-angle X-ray scattering and electron microscopy of crude dispersions of swelling lipids and the influence of the morphology on the repeat distance* 225
Announcement 235

No. 4

L.-I.S. Chen and C.-H. Chen (Albany, NY), *The formation of excimer and exciplex in the structural investigations of lipid vesicles: deuterium isotope effect* 237
H. Kuttenreich, H.-J. Hinz, M. Inczedy-Marcsek, R. Koynova, B. Tenchov and P. Laggner (Regensburg, F.R.G., Sofia, Bulgaria and Graz, Austria), *Polymorphism of synthetic 1,2-O-dialkyl-3-O-β-D-galactosyl-sn-glycerols of different alkyl chain lengths* 245
W.T. Fowler, Jr., J.D. Lambeth and G.L. Powell (Atlanta, GA and Clemson, SC), *Photoreactive cardiolipin analogues* 261
D.K. Wilson, W.K. Wilson, F.A. Quiocho and G.J. Schroepfer, Jr. (Houston, TX), *Concerning the structure of 3β-benzoyloxy-5β-cholesta-8,14-diene, a major byproduct in the chemical synthesis of 5α-cholest-8(14)-en-3β-ol-15-one* 273
D.K. Wilson, W.K. Wilson, F.A. Quiocho and G.J. Schroepfer, Jr. (Houston, TX), *Crystal structure of 3β-benzoyloxy-6α-chloro-5α-cholest-7-ene, a key intermediate in the chemical synthesis of 5α-cholest-8(14)-en-3β-ol-15-one* 283
F. Lakhdar-Ghazal (Toulouse, France), *Modulation by subphase pH and ions, of 12-(9-anthroyloxy)stearic acid mobility in phospholipid monolayers. A fluorescence recovery after photobleaching study* 291
R. Buchet (Syracuse, NY), *Dielectric relaxation spectroscopy on dimyristoylphosphatidylcholine-packaged gramicidin A* 299
